

Artega brings back the bubble car

Dear Sirs and Madams,

2020 is an electrifying year for us: Our beloved Autochen, the KARO-Isetta, is going to be launched soon!

The most important thing for you at a glance:

- **The all-electric KARO-Isetta takes over the heritage of the ISO Isetta**
- **Sales launch already in January 2020**
- **KARO-Isetta available in two trims and six colors**
- **First test drives and deliveries to be expected in April**
- **Urbane Mobility „Made in Germany“**

Not only the German craftsmanship make the KARO-Isetta a special car, but also the authentic vintage design: the KARO-Isetta has been officially acknowledged as the successor to the 50s ISO Isetta towards the heirs of the Isetta father.

The KARO-Isetta combines safety and functionality with ergonomics and utility value in compliance with the standards of the auto industry. In addition to high rigidity, safe driving behavior and optimal braking performance, fitting ergonomics and pleasant comfort are our aspirations.

In the coming days we will update you on the upcoming market launch. In the meantime, we invite you to browse through our FAQ section on www.artega.de. Here you can find further information about availability and options.

Follow us on Facebook, Twitter and Instagram. We are currently expanding our presence here and look forward to welcoming you here.

Also, we would like to use this as an opportunity to thank you. Especially for your tremendous support.

Together we will make cities more colorful and the air cleaner.

Have a great start to the new year!

Best Regards,

Artega Germany
